

## Law enforcement

**Siemens IT Solutions and Services Pty Ltd is an Australian company with 15 years experience in providing specialist software solutions to both the public and private sectors in the key markets of Law Enforcement, Government and Regulatory Agencies, and Boards of Inquiry. Eden is a key provider of digital evidence management solutions.**

Ideal for top-level investigations of any nature, GEMS™ is an intuitive evidence management system that improves the efficiency of any investigative team. Employing a familiar user-friendly interface, GEMS™ facilitates full document imaging and storage, enabling investigators to work with electronic copies of evidence minimising the handling of originals. GEMS™ goes beyond traditional spread sheet and record management systems, providing specialised investigative solutions, developed by investigators for investigators.

GEMS™ is a robust system designed to support task force and strike force type investigations, making it ideal for any

Law Enforcement agency. GEMS™ enables an investigator to gather material documents including; photographs, telephone intercepts, listening device products and video surveillance, allowing for management of evidence in preparation for persecution.

The Northern Territory Police (NTPOL) currently use GEMS™ as part of their Asset Forfeiture Group. While, agencies like the Australian Federal Police (AFP) use GEMS™ to streamline document-intensive cases offering support throughout all phases of the litigation life cycle from inception through to electronic brief.

GEMS™ produces written and electronic briefs of evidence that can be passed directly to counsel. It is proven in court and when necessary can assist in providing evidence during prosecutions through all levels of the courts. GEMS holds a pedigree of success in supporting several iconic Australian legal cases over the last decade. GEMS can be scaled to meet every requirement, it is suitable for small investigations right up to the largest case in history.
